

# DURALITE ROD HANDLER – SPEC SHEET

## OVERVIEW:

Duralite Rod Handlers are constructed from only the best quality materials and are designed to be both durable and lightweight. All aspects of the rod handler have been designed to ensure maximum safety for the user(s). Considerable attention has been given to the size and weight of every component to afford the most efficient disassembly, transport, and re-assembly possible. The total operational weight of the **Duralite Rod Handler is 2,250 lbs (1,020kg)** including the rod handler & rod rack (heli-portable version).

---

## Configuration Options

**Skid Mounted**

**Heli-portable**

**Man-portable**

---

## Performance:

**Rod Sizes:** B, N & H or B, N, H & P\*

**Rod stacking height:** 20 ft (6 meters)

**Rod Rack Capacity:** 2700 ft (810 meters) "N" (Skid Configuration)

3300 ft (990 meters) "N" (Heli-portable Configuration)

**Possible Drilling Angles:** 45° to 90°

---

## Weight:

**Rod Handler:** 1500 lbs (680 kg)

**Rod Rack:** 750 lbs (340 kg)

**Total Weight:** 2250 lbs (1020 kg)
